I love the idea you have for the cards. To add to that, on each card have a number they should get of that item. Ex. Qtips 10 cards with them getting 2 boxes for each card pulled. Sorry – confusing. Just call me and I will try to explain better. & If you need this info below in a printable document, I can do that.

Hair Ribbons 5/8" rolls **25 cards**

Combs **30 cards**

Barrettes **30 cards**

Ponytail Holders **30 cards**

Q tips **10 cards w/2 on each card (so when they pulled a Qtip card they would see they needed to purchase 2 boxes)**

Cotton Balls **30 cards w/2**

Fingernail Files **20 cards w/5**

Fingernail Clippers **30 cards w/5**

Fingernail Polish **20 cards w/5**

Small Lotions **25 cards w/3**

Small Mirror **25 cards w/3**

Chapstick **25 cards w/5**

Bandaids **25 cards**

Toothbrushes/Small Toothpaste **25 cards w/6**

Also, we need to add:

Ziploc Bags
Gallon (zipper seal) **20 w/5**
Sandwich (zipper seal or press seal) **20 w/5**

Colorful yarn for knitting

Assay Description and EDTA assay

Herceptin® (trastuzumab) is a monoclonal antibody that binds specifically to the extracellular domain of the human epidermal growth factor receptor 2 (HER2) protein. Overexpression of this receptor is found in some breast cancers and is a predictive factor for response to Herceptin®. Herceptin® is indicated for the treatment of breast cancer patients who have metastatic disease or have undergone adjuvant therapy. Patients for treatment with Herceptin® should be selected for HER2 testing based on specific criteria. Herceptest™ is a qualitative assay for the detection of HER2 protein overexpression in formalin-fixed, paraffin-embedded breast cancer tissue using the Dako Autostainer Plus. Herceptest™ is performed using the Dako EnVision™ FLEX+ Visualization System. Herceptest™ is intended for use as an aid to the assessment of breast cancer patients for treatment with Herceptin®. Herceptest™ should be performed only in laboratories that have been trained in the Herceptest™ procedure. Herceptest™ is not intended for use with other antibody or treatment regimens.

He Will Carry Us Home

December 29

by

Charles Haddon Spurgeon

"And even to your old age I am He, and even to hoar hairs will I carry you! I have made, and I will bear; even I will carry, and will deliver you" (Isaiah 46:4)

The year is very old, and here is a promise for our aged friends; yes, and for us all, as age creeps over us. Let us live long enough, and we shall all have hoar hairs, therefore we may as well enjoy this promise by the foresight of faith.

When we grow old our God will still be the I AM, abiding evermore the same. Hoar hairs tell of our decay, but He decayeth not. When we cannot carry a burden and can hardly carry ourselves, the LORD will carry us. Even as in our young days He carried us like lambs in His bosom, so will He in our years of infirmity.

He made us, and He will care for us. When we become a burden to our friends and a burden to ourselves, the LORD will not shake us off, but the rather He will take us up and carry and deliver us more fully than ever. In many cases the LORD gives His servants a long and calm evening. They worked hard all day and wore themselves out in their Master's service, and so He said to them, "Now rest in anticipation of that eternal Sabbath which I have prepared for you." Let us not dread old age. Let us grow old graciously since the LORD Himself is with us in fullness of grace.

Frequently Asked Questions

You can find more information about your product in the *User Manual* available at *http://support.netgear.com*.

1. **The Smart Wizard keeps asking me for my passphrase, and I am sure I have entered the correct passphrase. What can I do?**

   It is very likely that the Extender is placed at the borderline of the range covered by the router. Follow the instructions in the previous section to resolve this. If you are using WEP security, make sure that you are typing the wireless key in the correct field.

2. **I connected to NETGEAR_EXT and launched a browser. Why can't I see the Smart Wizard?**

   First, make sure your computer is set up to use DHCP (it will be). Second, make sure the PC to Extender status LED is green and you have a valid IP address. Finally, re-launch the browser and enter www.mywifiext.net.

3. **Will the Extender work if I connect it to the router with an Ethernet cable?**

   No. The Extender is designed to connect wirelessly to the router.

4. **What are the user name and password to log in to the Extender?**

   The user name is **admin** and the default password is **password**. Both are case-sensitive.

Apple's Swift Core Team Talks Swift 4.1 in New Podcast Monday March 19, 2018 11:17 AM PDT by Juli Clover

Two members of Apple's Swift Core Team, Doug Gregor and Ben Cohen, joined the Swift Unwrapped podcast this morning where they discussed Swift 4.1 and all of the changes that are coming in the update.

Cohen manages Apple's Swift Standard Library Team while Gregor works on the Swift Compiler and Library Design. The discussion of Swift 4.1 is rather technical and may not interest all readers, but it will be a worthwhile listen for those who work with Swift.

The initial beta of Swift 4.1 was released alongside the first beta of Xcode 9.3 and iOS 11.3 on January. Swift 4.1 is nearing the end of its beta, so any period and it will be released when Xcode 9.3 and iOS 11.3 are released. All of Apple's new software is expected soon, and a launch could happen as soon as this week.

The 19 minute Swift Unwrapped episode with Doug Gregor and Ben Cohen can be listened to here or in the Apple Podcasts app.

Test Your Fax

From PhonePower Knowledge Base
Jump to: navigation, search

You can test the capability of your fax machine to send and receive faxes. To test the capability of your fax machine, follow the directions below. This is a valid fax line monitored by MF and is at no way associated with PhonePower.

Note: Be sure that your phone number is not Caller ID protect by your telephone company prior to attempting to send and receive a fax. Dropping *82 before dialing the toll free number will withhold the Caller ID blocking feature in most areas. Other phone company services can prevent you from receiving a fax, including voice mail, call machine, or call privacy manager.

Note: Whenever troubleshooting a fax issue, it is good practice to set the Automatic Reports option in Every Error before attempting a test fax. This way, even if the test fax fails, an error code will be generated that will guide you in future troubleshooting. This option is available in standard phones on different products, consult the product User's Guide for product steps.

---

1. Send a one page blank and white test fax to 1-888-473-2963.

2. When your fax is received a voice fax will be sent to you within few minutes confirming that the received your fax. The number that you fax both send and receive a fax with your fax machine.

3. If you do not receive a reply fax within 5-7 minutes there may be a problem with the setup of your fax machine. Consult the user manual that came with the product for proper setup and configuration.

Note: The most common reason of failure is that the fax number set in the Fax Header for the terminal does not match the number of the phone line connecting to the fax. Also, ensure that the fax header contains the full 10-digit telephone number of the fax machine, including the area code.

Bacon and cheese are two of life's greatest food pleasures. When you find a way to combine them in a dish, it's heaven in a pan! If you can find a way to toss ranch dressing in the mix, well, you've achieved virtual culinary perfection. The Cooktop Cove have found a way to do just that.

The dish is pretty quick and easy, plus you probably have most of the ingredients you need on hand. That's a bonus for the bank account!

For this recipe you re going to need boneless, skinless chicken breast (marinated in a mix of olive oil, a packet of ranch dressing and cooked) pasta (cooked and drained) 1-1/2 cups of your favorite soft cheese (mozzarella and cheddar work great) bacon and Alfredo sauce.

If you don't feel like marinating your chicken or you just want a quick substitute, Betty Crocker recommends grabbing a rotisserie chicken from the store.

If you don't have access to ranch dressing, this recipe from Food Network will give you a tasty home-made version. If you skip marinating with the Ranch mix, try coating your chicken in a thin layer of ranch before adding it to your dish.

You'll mix your chicken, pasta and Alfredo sauce (or other favorite cream-based sauce) together in a bowl and pour it into a casserole dish. Top with cheese and crispy bacon. Heat to melt the cheese

Check out the video below for complete step-by-step instructions

The best thing about this dish is that it's easy to change as needed. You can add vegetables, swap out the pasta for chunks of bread, or use a cream based soup instead of Alfredo sauce

This filling dish is sure to have everyone begging for seconds! Have you tried this dish? Share what you thought in the comments below

Secure Your Tax Records from Identity Theft

Identity theft occurs when someone uses your personal information, such as your name, SSN, or other identifying information, without your permission, to commit fraud or other crimes. An identity thief may use your SSN to get a job or may file a tax return using your SSN to receive a refund.

To reduce your risk:

- Protect your SSN,
- Ensure your employer is protecting your SSN, and
- Be careful when choosing a tax preparer.

If your tax records are affected by identity theft and you receive a notice from the IRS, respond right away to the name and phone number printed on the IRS notice or letter.

If your tax records are not currently affected by identity theft but you think you are at risk, this is also a time to act. For example, if your purse or wallet is stolen or if you notice a credit report, contact the IRS identity Theft Hotline at 1-800-908-4490 or submit Form 14039.

For more information, see Publication 4535, Identity Theft Prevention and Victim Assistance.

Victims of identity theft who are experiencing economic harm or a system problem, or are seeking help in resolving tax problems that have not been resolved through normal channels may be eligible for Taxpayer Advocate Service (TAS) assistance. You can reach TAS by calling the TAS toll-free case intake line at 1-877-777-4778 or TTY/TDD 1-800-829-4059.

Protect yourself from suspicious emails or phishing schemes. Phishing is the creation and use of email and websites that mimic legitimate business emails and websites. The most common act is sending an email to a user falsely claiming to be an established enterprise in an attempt to scam the user into surrendering private information that will be used for identity theft.

The IRS does not initiate contact with taxpayers via emails. Also, the IRS does not request personal detailed information through email or ask taxpayers for the PIN numbers, passwords, or similar secret access information for their credit card, bank, or other financial accounts.

If you receive an unsolicited email claiming to be from the IRS, contact this message to phishing@irs.gov. You may also report misuse of the IRS name, logo, or other IRS property to the Treasury Inspector General for Tax Administration (TIGTA) at 1-800-366-4484. You can forward suspicious emails to the Federal Trade Commission at: spam@uce.gov or report them at www.ftc.gov/idtheft or 1-877-IDTHEFT (1-877-438-4338).

Visit IRS.gov to learn more about identity theft and how to reduce your risk.

Privacy Act Notice

Section 6109 of the Internal Revenue Code requires you to provide your correct TIN to persons (including federal agencies) who are required to file information returns with the IRS or report interest, dividends, or certain other income paid to you; mortgage interest you paid; the acquisition or abandonment of secured property; the cancellation of debt; or contributions you made to an IRA, Archer MSA, or HSA. The person collecting this form uses the information on the form to file information returns with the IRS, reporting the above information. Routine uses of this information include giving it to the Department of Justice for civil and criminal litigation and to cities, states, the District of Columbia, and U.S. commonwealths and possessions for use in administering their laws. The information also may be disclosed to other countries under a treaty, to federal and state agencies to enforce civil and criminal laws, or to federal law enforcement and intelligence agencies to combat terrorism. You must provide your TIN whether or not you are required to file a tax return. Under section 3406, payers must generally withhold a percentage of taxable interest, dividend, and certain other payments to a payee who does not give a TIN to the payer. Certain penalties may also apply for providing false or fraudulent information.

How To test functionality of your fax machine

To test the send functionality of your fax machine, send a one-page fax to 1 888 877 1655 (a toll free number in the United States.) When it's finished transmitting, point your web browser to FaxZero.net -- it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero.net. This site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring -- hopefully, it will automatically answer and spit out the test fax.

To the right are pages that folks have faxed us recently. Click any thumbnail to see the large version and rate it for interestingness.

You can fax something interesting to 1 888-877-1655 (your fax will never arrive... maybe) or 1 503-200-1360 (long distance to Portland, Oregon) and it should appear here within a couple of minutes. (It's a toll free number if you're in the USA.) Keep it clean & legal.

Fax single-page documents with no cover sheet. If you fax more than one page, only the last page will appear here. We try to snip off the top few pixels of the page where your company name and fax number should appear, but make no promises that this will actually work.

Get an e-mail alert when FaxToy receives a new fax.

HP ePrint

Print from Anywhere

HP ePrint provides a secure, easy way to print from almost anywhere and from any device whether it is located next door or around the world. Simply email documents and photos to the printer's assigned email address and they will print. Supported attachment types include Adobe PDF, HP Print Service Plug-in, and standard image formats.

To use HP ePrint, you may need to first register your HP printer on the HP Connected website. Go to www.hpconnected.com for more information and to create an HP ePrint account.

Your Privacy is Protected

To help prevent unwanted e-mail, the printer is given a random e-mail address. Only people who know this address can send documents to the printer. Documents sent from unauthorized addresses will be rejected. You can further control who is allowed to print by setting up allowed senders in your HP Connected account. Only e-mails sent from these addresses will be printed. Additionally, you can choose to have a confirmation e-mail sent back to you to verify that the document was received by the printer.

NOTE: The ePrint service only supports e-mails sent from secure HTTPS servers. The printer does not receive e-mails sent from unsecure servers.

Apps

Print from the Web Without a Computer

Apps enables you to discover and print web content directly to your printer.

Visit www.hpapps.com/us to learn more.

HP Connected

Use the HP Connected Web Site

Use HP Connected (which may be referred to as Hosted Apps, Specific Web Apps, or Web Connected) to set limits on the websites that can be printed from your printer. Go to www.hpconnected.com to create an account and select from a library of approved Web Apps for your printer. You can also add additional websites to the approved list.

Web Apps are specially formatted websites that are designed specifically for printing. Many Web Apps allow you to print coupons that can be redeemed when you shop in person or online.

Test cricket is the longest form of the sport of cricket. Test matches are played between national representative teams with "Test status" as determined by the International Cricket Council (ICC). The two teams of 11 players play a four innings match, which often lasts up to five days. It is generally considered the most complete examination of teams' playing ability and endurance.[1][2][3] The origin of the name, Test stems from the long, gruelling match being a "test" of the relative strength of the two sides.[4]

The first officially recognised Test match began on 15 March 1877, between England and Australia at the Melbourne Cricket Ground (MCG), where Australia won by 45 runs.[5] A Test match to celebrate 100 years of Test cricket was held in Melbourne from 12 to 17 March 1977, in which Australia beat England by 45 runs—the same margin as that first Test.[6]

In October 2012, the International Cricket Council recast the playing conditions for Test matches, permitting day/night Test matches.[7]

Test status[edit]

Test matches are included in first-class cricket. Matches are played between national representative teams with "Test status" as determined by the International Cricket Council. As of December 2014, ten national teams have Test status, the most recently promoted being Bangladesh in 2000. Zimbabwe's Test status was voluntarily suspended, because of poor performances between 2006 and 2011, it returned to competition in August 2011.[8]

In January 2014, during the historic ICC meeting in Dubai, the pathway for new potential test nations was laid out with the winners of the next round of the ICC Intercontinental Cup playing a 5-day match against the bottom rank test nation. If the Associate team defeats the test nation then they could be added as the new test country and be given full membership.

A list of matches, defined as "Tests", was first drawn up by Australian Clarence Moody in the mid-1890s. Representative matches played by simultaneous England touring sides of 1891–92 (in Australia and South Africa) and 1929–30 (in the West Indies and New Zealand) are deemed to have "Test status".

In 1970, a series of five "Test matches" was played in England between England and a 'Rest of the World XI'. These matches, originally scheduled between England and South Africa, were amended after South Africa was suspended from international cricket because of their government's policy of apartheid. Although initially given Test status (and included as Test matches in some record books, including Wisden Cricketers' Almanack), this was later withdrawn and a principle was established that official Test matches can only be between nations. Despite this, in 2005, the ICC ruled that the six-day Super Series match that took place in October 2005 between Australia and a World XI was an official Test match. Some cricket writers and statisticians, including Bill Frindall, ignored the ICC's ruling and excluded the 2005 match from their records. The series of "Test matches" played in Australia between Australia and a World XI in 1971/72 do not have Test status. Kerry Packer World Series Cricket

This is the top line

When in the Course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another and to assume among the powers of the earth, the separate and equal station to which the Laws of Nature and of Nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness.--That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed, --That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness. Prudence, indeed, will dictate that Governments long established should not be changed for light and transient causes; and accordingly all experience hath shewn, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same Object evinces a design to reduce them under absolute Despotism, it is their right, it is their duty, to throw off such Government, and to provide new Guards for their future security.--Such has been the patient sufferance of these Colonies; and such is now the necessity which constrains them to alter their former Systems of Government. The history of the present King of Great Britain is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute Tyranny over these States. To prove this, let Facts be submitted to a candid world.

He has refused his Assent to Laws, the most wholesome and necessary for the public good.
He has forbidden his Governors to pass Laws of immediate and pressing importance, unless suspended in their operation till his Assent should be obtained; and when so suspended, he has utterly neglected to attend to them.
He has refused to pass other Laws for the accommodation of large districts of people, unless those people would relinquish the right of Representation in the Legislature, a right inestimable to them and formidable to tyrants only.
He has called together legislative bodies at places unusual, uncomfortable, and distant from the depository of their public Records, for the sole purpose of fatiguing them into compliance with his measures.
He has dissolved Representative Houses repeatedly, for opposing with manly firmness his invasions on the rights of the people.
He has refused for a long time, after such dissolutions, to cause others to be elected; whereby the Legislative powers, incapable of Annihilation, have returned to the People at large for their exercise; the State remaining in the mean time exposed to all the dangers of invasion from without, and convulsions within.
He has endeavoured to prevent the population of these States; for that purpose obstructing the Laws for Naturalization of Foreigners; refusing to pass others to encourage their migrations hither, and raising the conditions of new Appropriations of Lands.

B2 CONSTRUCTORS

22 December 2015

General Services Administration
Acquisition Management Division
520 South Eighth Street
Springfield, IL 62703
Attn: Martin Harris

Subject: Letter of Transmittal, B2 Constructors, LLC proposal submission for Solicitation GS05P16SCC7069 issued 19 November 2015, DA Tank Replacement; Due NLT 1500 local time, December 22 2015

Dear Mr. Harris:

B2 Constructors submits our proposal for award as a Prime Contractor to install the new Deaerator Tank, associated piping and controls, structural steel and insulation at the Federal Center in Jeffersonville, Indiana. B2 Constructors will provide all labor, a dedicated Project Manager, qualified and competent supervision, certified welders, materials, tools, equipment and consumables to perform the replacement of the DA Tank in accordance with the issued solicitation.

Offeror:	B2 Constructors, LLC
Address:	4541 Meadow Green Lane Acworth, GA 30101
Phone:	(317) 362-1970
Cage Code:	7EBR0
DUNS:	079876907 **FEIN:** 47-4254931
Business Size:	Service Disabled Veteran Owned Small Business

B2 Constructors has provided an option in our quote that we feel will provide a higher return on investment and greatly extend the life cycle of the new tank.

1. Our base bid includes the lined Cleaver Brooks DA as specified, but we have provided alternate pricing for a Stainless Steel DA and Storage Tank. The cost increase is roughly 6% over the cost of the Carbon Steel tank and we feel this is greatly increases the useful life of the DA and storage tank. The pricing for the option is as follows.
    a) Base Bid - $410,647.88
    b) Option 1 – Add $9,056.45 (Total Price = $419,104.13)
    c) Option 2 – Add $15,848.44 (Total Price w/ Base and Opt.1 = $434,952.56)

    The Stainless Steel DA is an "or equal" tank from Shipco. We have personal experience with this manufacturer and installed a Shipco system on a 550MW 4,000,000 #/hr @ 2400 psig utility boiler (reference provided). This system handled 275,000 lb./hr. superheated steam to a Steam Coil Air Heater and is a very robust and capable system. The stainless doesn't require a lining as a carbon tank does and is recommended for partial year use DA's. Water penetrates the lining, gets between the tank and the lining and corrodes the tank, thereby causing the lining to peel due to lack of adhesion. After the lining peels it's difficult to place another lining in the tank successfully and adhere to the steel. The quoted Stainless Steel is 304L and the tank is ASME stamped at 30 psig, versus 50 psig. We feel a 50 psig rated tank isn't

> " ... after 50 years of Israeli history, classic Zionism has revealed no solution to the Palestinian presence. I therefore see no other way than to begin now to speak about sharing the land that lies thrust us together, sharing it in a truly democratic way with equal rights for all citizens."[22]

In October 2003, New York University scholar Tony Judt broke ground in his article, "Israel: The Alternative" in the *New York Review of Books* in which he argued that Israel is an "anachronism" in sustaining an ethnic identity for the state and that the two-state solution is fundamentally doomed and unworkable.[23] The Judt article engendered considerable debate in the UK and the US and *The New York Review of Books* received more than 1,000 letters per week about the essay. A month later, political scientist Virginia Tilley published "The One-State Solution" in the *London Review of Books*, arguing that West Bank settlements had made a two-state solution impossible and that the international community must accept a one-state solution as the de facto reality.[24]

Leftist journalists from Israel, such as Haim Hanegbi and Daniel Gavron, have called for the public to face the facts (as they see them) and accept the binational solution. On the Palestinian side, similar voices have been raised. Israeli Prime Minister Olmert argued in a 2007 interview with the Israeli daily *Ha'aretz* that without a two-state agreement Israel would face "a South African-style struggle for equal voting rights" in which case "Israel [would be] finished".[25]

Antony Lerman has written that a de facto single state already exists, detailing Israel's control over the West Bank and Gaza.[26]

Map of the West Bank and the Gaza Strip, in 2007. Finding mutually acceptable borders has posed a major difficulty for the two-state solution.

John Mearsheimer, co-director of the Programme on International Security Policy at the University of Chicago, says the binational solution has become inevitable. He has further argued that by allowing Israel's settlements to prevent the formation of a Palestinian state the United States has helped Israel commit "national suicide" since Palestinians will be the majority group in the binational state.[27]

A poll conducted in 2010 by Israel Democracy Institute suggested that 15% of right wing Jewish Israelis and 16% of left-wing Jewish Israelis support a binational state solution over a two states solution based 67 lines. However, according to the same poll, 66% of Jewish Israelis preferred the two-state solution.[28]

In 2012 in an article in Al-Quds Al-Arabi newspaper Ahmed Qurei called for Palestinians to reconsider a one-state instead of a two-state solution. He stated that the "one-state solution, despite the endless problems it embraces, is one of the solutions that we should be contemplating through an internal dialogue." He blamed Israel for "burying" or "decapitating" the two-state solution though the building of settlements.[29]

Arguments for and against

Support among Israeli Jews, and Jews generally, for a one-state solution is very low.[4] Israelis see a one-state solution as a demographic threat that would overturn the prevailing Jewish majority within Israel.[30][31]

In favor

Proponents of a one-state solution argue that it ensures the equal rights of all ethnicities in the greater Israel and Palestine area (Israel, West Bank, Gaza), by abiding in the rights granted to all people found in the original Israeli Declaration of Independence

Test your fax machine without bothering friends

I found the site below while trying to see if a fax machine was working correctly. It is always tough finding a fax because you have to have a friend who is home, with a fax and willing to help. Thanks to a commenter you can try the test fax service from HP as well

The site lets you enter a fax number and, in a few minutes, you will receive a test fax

If this helped consider buying me a beer or an Americano!

How Can I Test My Fax Machine?

Submitted by Smart Computer User on December 9, 2006 12:00pm

Presumably you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both:

To test the send functionality of your fax machine, send a one-page fax to 1-818-547-0980 (a number in Northern California.) When it's finished transmitting, point your web browser to Fax Zero http://faxzero.net/ — it's a free web site that displays whatever faxes it has sent either. Within a minute you should appear on the site. Click the thumbnail to see a large version

To test the receive functionality of your fax machine, point your web browser to FaxZero: http://faxzero.com/ this site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully it will auto-friendly answer and spit out the test fax.

Radon: Protect your family and protect your home

Indoor **Radon** is the second leading cause of lung cancer in the United States and the leading cause among non-smokers. The EPA works to raise the public's awareness about radon and the importance of testing for radon ... especially in homes and schools. The EPA, working in concert with Federal, State and local governments as well as volunteer organizations, conducts many different programs to educate Americans about the indoor radon health threat. About 1 in 15 homes has high radon levels. If you haven't tested your home do it now. If you have further questions about Radon please call the National Radon Information Line at: 1-800-SOS-RADON [1-800-767 7236]

Lung cancer kills thousands of Americans every year. *Radon* is the number one cause of lung cancer among non-smokers according to EPA estimates. Overall, radon is the second leading cause of lung cancer. Radon is responsible for about 21 000 lung cancer deaths every year. About 2 800 of these deaths occur among people who have never smoked. On January 13, 2005, Dr. Richard H. Carmona, the U.S. Surgeon General, issued a national health advisory on radon.

Why is radon the public health risk that it is? EPA estimates that about 20 000 lung cancer deaths each year in the U.S. are radon-related. Exposure to radon is the second leading cause of lung cancer after smoking. Radon is an odorless, tasteless and invisible gas produced by the decay of naturally occurring uranium in soil and water. Radon is a form of ionizing radiation and a proven carcinogen. Lung cancer is the only known effect on human health from exposure to radon in air. Thus far, there is no evidence that children are of greater risk of lung cancer than are adults.

Radon in air is ubiquitous. Radon is found in outdoor air and in the indoor air of buildings of all kinds. EPA recommends homes be fixed if the radon level is 4 pCi/L (pico Curies per Liter) or more. Because there is no known safe level of exposure to radon, EPA also recommends that Americans consider fixing their home for radon levels between 2 pCi/L and 4 pCi/L. The average radon concentration in the indoor air of America's homes is about 1.3 pCi/L. It is upon this level that EPA based its estimate of 20 000 radon-related lung cancers a year upon. It is for this simple reason that EPA recommends that Americans consider fixing their homes when the radon level is between 2 pCi/L and 4 pCi/L. The average concentration of radon in outdoor air is 0.4 pCi/L or $1/10^{th}$ of EPA's 4 pCi/L action level.

For smokers the risk of lung cancer is significant due to the synergistic effects of radon and smoking. For this population about 62 people in a 1 000 will die of lung-cancer, compared to 7.3 people in a 1 000 for never smokers. Put another way: a person who never smoked who is exposed to 1.3 pCi/L has a 2 in 1 000 chance of lung cancer; while a smoker has a 20 in 1 000 chance of dying from lung cancer. Figure A compares the risks between smokers and never smokers; smokers are at a much higher risk then never smokers, e.g. at 8 pCi/L the risk to smokers is six times the risk to never smokers.

The radon health risk is underscored by the fact that in 1986 Congress added Title III on Indoor Radon Abatement to the Toxic Substances Control Act. It modified and funded EPA's then fledgling radon program. Also that year, the Office of the U.S. Surgeon General issued a warning about radon, urging Americans to test their homes and to reduce the radon level when necessary.

Windows® Fax and Scan

FAX: You can send and receive faxed documents on your computer, without using a fax machine. You can also print, e-mail, or save a copy of your faxes.

To get started:

1. Connect a phone line to your computer.

   If your computer came with a fax modem, you probably connected the modem to the phone line when you set up your computer.

2. On the command bar, click **New fax**.

   Follow the wizard, which will help you enter recipient and fax information, and then, if you want, add a cover page to your fax.

To learn more about faxing, see "Faxing" in Windows Help and Support. For more information, see the Help and Support Privacy Statement.

SCAN: After you add a scanner to your computer, you can preview documents or photos before you scan them. Use the preview to adjust your scan settings for better results. You can then save the scanned item as a picture file, or attach it to an e-mail message.

To get started:

1. Connect and install a scanner for your computer by following the instructions that came with your scanner. (If you haven't already done so, turn on your scanner.)

2. On the toolbar, click **New Scan**. (If the toolbar isn't visible, click **File**, and then click **New Scan**.)

   Or, double-click **Add Image**.

3. Follow the instructions that appear on your screen.

PHP

From Wikipedia, the free encyclopedia

PHP is a server-side scripting language designed for web development but also used as a general-purpose programming language. PHP is now installed on more than 244 million websites and 2.1 million web servers.[2] Originally created by Rasmus Lerdorf in 1995, the reference implementation of PHP is now produced by The PHP Group.[3] While PHP originally stood for *Personal Home Page*, it now stands for *PHP: Hypertext Preprocessor*, a recursive acronym.[4]

PHP code is interpreted by a web server with a PHP processor module which generates the resulting web page: PHP commands can be embedded directly into an HTML source document rather than calling an external file to process data. It has also evolved to include a command line interface capability and can be used in standalone graphical applications.[5]

PHP is free software released under the PHP License, which is incompatible with the GNU General Public License (GPL) due to restrictions on the usage of the term *PHP*.[6] PHP can be deployed on most web servers and also as a standalone shell on almost every operating system and platform, free of charge.[7]

BWCA Lessons learned.

Don t ever pack! Hauling a too heavy packcan put damper on the trip. spend the money for a decent pack. you can get them for $50 and gander mountain and limit yourself to that pack.

Don t bring collapseable fishing poles. They break easy

Bring leaches. Or bring minnows.

Do your homework on fishing. bring a local with you or maybe even hire a guide. You are not guaranteed to catch fish.

Bring a fish net. Maybe collapseable, if it is durable.

Don t plan too may meals that require cooking over a camp fire. It takes a long time to find wood build the fire. boil water. cook. clean up. etc etc. If you must do this. do it for lunch

Bring prepackaged energy food for breakefast. granola bars. pop tarts. gorp. jerky

Coordinate quantities with the others to avoid bringing too much.

Daily plan should be something like this.
- Get up early and fish.
- If you have success come back and eat them for lunch
- Relax in the afternoon. Go back out and fish in the evening.

Don t change your clothes until they get wet

Chairs are a luxury that may be worth it

Use the campstove more. it may be heavy but it will save a ton of time in the campsite. Bring extra stoves if you have a big group.

Find your campsite before noon. Pick a site that has good access to daytrip canoe routes. don t move every day. Also be sure there is enough airflow to allow a place to be with fewer bugs.

Prepackage your meals in a ziploc and write the amount of water needed on the bag

Bring a ladle for water that holds exactly a cup of water

Bring a ceramic water filter. You can clean it in the field.

Bring people who can pull their weight and don t complain. Don t bring young or needy children unless you want to spend your time taking care of them. If you do bring children, bring lots of snacks and junk food as kids get hungry often and you don t want to have to cook all the time.

Prepare for rain! Storms can come up quickly. bring your rain gear whenever you go out

Program a GPS with key locations and alternate locations. Mark these on your map. It can save you time looking for portages.
Bring a weather radio so you can plan your day trips, and cut your trips short if the weather

CancerTYPE ID — Molecular Classification with CancerTYPE ID

FFPE Tissue Processing & Tumor Enrichment

- CancerTYPE ID requires as few as 300-500 viable tumor cells and is compatible with limited biopsy specimens such as FNAs, cytological specimens, and small core needle biopsies.
- CancerTYPE ID routinely employs laser guided microdissection to enrich for tumor specimen.

Gene Expression Profiling

- CancerTYPE ID uses a robust real-time RT-PCR platform to detect very small differences in gene expression.
- CancerTYPE ID measures and integrates the gene expression of 92 genes, 5 normalization genes and 87 lineage determinant and tissue-specific genes, most of which are not routinely measured by IHC.

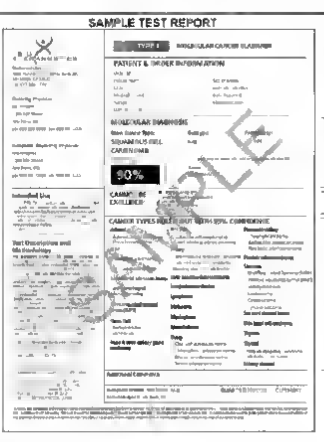
Reference Tumor Database & Algorithm

- CancerTYPE ID uses a computational algorithm to predict the patient's tumor type based on the degree of similarity of the sample's 92-gene expression profile to a reference database of gene expression profiles. The reference database contains gene expression information from over 2,000 tumor specimens of known histogenesis, and representing ~95% of all solid tumors based on incidence.
- The CancerTYPE ID algorithm provides a predicted main type and any sub-types in rank-order by relative probabilities, which are based on the tumor's gene expression similarity to tumors of these types in the reference database.

Molecular Classification

- CancerTYPE ID classifies 28 tumor types and 50 tumor subtypes.
- In an independent validation of 2998 blinded samples, the molecular diagnosis was 87% accurate for main tumor type and 86% accurate for tumor subtype.

SAMPLE TEST REPORT



Interpreting CancerTYPE ID Test Results

MOLECULAR DIAGNOSIS

The [redacted] molecular diagnosis is the CancerTYPE ID prediction of certain tumor subtypes. It is reported probability (≥ 80%), the tumor is reported as "Indeterminate", in this case, the test report will also indicate tumor types that can be ruled out (see below) that cannot be excluded.

CAN NOT BE EXCLUDED

When applicable, tumor types on the CancerTYPE ID reference database that share some gene expression profile similarity to the patient's sample such that they cannot be excluded. Item diagnostic consideration will be listed here in rank order.

RULE OUTS

The CancerTYPE ID test report also lists tumor types that can all be ruled out with 95% confidence. In an independent validation of 2998 blinded samples, the rule-outs were 95% accurate. This may provide useful differential diagnostic information when two or more potential tumor types are suspected and one or more tumors may be ruled out in the rule outs.

Figure 1.6 Active mode requires that the server initiate the connection on the data port.

Passive-mode FTP communications can be used to correct the problem with active-mode communications. Passive mode starts with the client selection of two ports n and n+1. The client will use port n to initiate communications to port 21 of the server. When the server responds, the client sends a pasv command to the server. The server selects a random port p to use for data communications and sends the port number to the client. The client then initiates communications on the data port (n+1) to the server's data port (p), as shown in Figure 1.7.

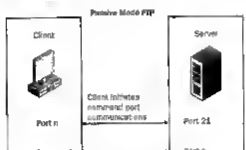

Figure 1.7 When using passive mode, the client initiates communications on the command and data ports.

Act of Contrition

O my God, I am heartily sorry for having offended you, and I detest all my sins, because of Your just punishments, but most of all because they offend You, my God, who are all-good and deserving of all my love. I firmly resolve, with the help of Your grace, to sin no more and to avoid the near occasion of sin.

Security Key

What is a Network Security Key?

The network security key is the password or pass phrase that you use to authenticate with your home network. In order to establish a secure connection with your wireless router, you have to provide the key to prove that you are authorized to do so. The key is established on a setting on the wireless router, and each device connecting to it will be required to match it.

How to Find Your Network Security Key

You can view the security key from the settings on computers already connected to WiFi

Windows 7

1. Click the Start button
2. Click Control Panel
3. Under "Network and Internet" click "View network status and tasks"
4. On the left hand menu click "Manage Wireless Networks". Then locate your wireless network on the new menu.
5. Right-click on your wireless network and select Properties.
6. Click on the Security tab
7. Check the box that says "Show characters" if it is not already checked
8. The Network security key box will display your key. You can use this same key to connect other devices to your network.

DIY Healing Hot Spot & Anti-Itch Spray For Dogs

INGREDIENTS

- 4 Tbsp witch hazel
- 2 Tbsp aloe vera gel
- 1 Tbsp vegetable glycerin
- 1 Tbsp hemp seed oil (you can substitute coconut oil here if you like. It is also extremely great at healing hot spots and itchy problems because of it's antibacterial/antiviral/analgesic properties, but in the winter you will have to run your bottle under warm water until the coconut oil melts - which is why I suggest my other favorite ultra healing carrier oil here.)
- 1 tsp. colloidal silver (*optional* – this is used by many vets to help with rashes and other irritations. It's a natural antibiotic, and can be found in your local health foods store or on Amazon)
- 2 drops geranium essential oil
- 5 drops lavender essential oil
- 6 drops cedarwood essential oil
- water to fill the spray bottle (if you want to get really creative you can use tea or a hydrosol here as well - but this may change the shelf life of the spray if you use tea. Store in the fridge for a longer shelf life)

NOTE: you can add or substitute a couple drops of frankincense, chamomile, and/or carrot seed if you do not have one more more of those essential oils above or want additional healing essential oils in this recipe)

Dear Employees:

It has been brought to management's attention that some individuals throughout the company have been using foul language during the course of normal conversation with their co-workers.

Due to complaints received from same employees who may be easily offended, this type of language will no longer be tolerated.

We do, however, realize the critical importance of being able to accurately express your feelings when communicating with co-workers.

Therefore, a list of 18 new and innovative phrases has been provided so that proper exchange of ideas and information can continue in an effective manner.

Prayer to St Joseph over 1900 years old

O St Joseph whose protection is so great so strong, so prompt before the Throne of God, I place in you all my interests and desires. O St. Joseph do assist me by your powerful intercession and obtain for me from your Divine Son all spiritual blessings through Jesus Christ Our Lord, so that having engaged here below your Heavenly power I may offer my Thanksgiving and Homage to the most Loving of Fathers. O St. Joseph I never weary contemplating you and Jesus asleep in your arms I dare not approach while He reposes near your heart Press him in my name and kiss His fine Head for me, and ask Him to return the Kiss when I draw my dying breath St Joseph, Patron of departing souls, pray for us Amen

Say for nine consecutive mornings for anything you may desire. It has seldom been known to fail.

This prayer was found in the fiftieth year of Our Lord Jesus Christ In 1500's it was sent by the Pope to Emperor Charles when he was going into battle

Whoever reads this prayer or hears it or carries it, will never die a sudden death nor be drowned, nor will poison take effect on them. They will not fall into the hands of the enemy nor be burned in any fire, nor will they be defeated in battle

Make this prayer known everywhere.

Imprimatur
Most Rev. George W. Ahr
Bishop of Trenton

FAQs & Troubleshooting

Date: 04/25/2014 ID: faq00002656_015

I'm using MagicJack and am having problems sending or receiving faxes.

MagicJack is a Voice Over Internet Protocol (VoIP) phone service that you can use with your high-speed Internet connection.

Brother does not support the use of its fax machines and Multifunction Centers with MagicJack.

For information about connecting your Brother machine to MagicJack, click here

If you want to use your modem machine to send and receive faxes over MagicJack, we recommend you contact MagicJack and ask them which modem speed they recommend for faxing.

Set the Brother machine's modem speed to their recommendation by following these steps:

1. Press [redacted] (Settings).
2. Press the Up or Down arrow key to display **Initial Setup**.
3. Press **Initial Setup**.
4. Press the Up or Down arrow key to display **Compatibility**.
5. Press **Compatibility**.
6. Press the modem speed you want to use.

You can choose High (For some modem), **Modem** or **Basic (for VoIP)**.

- **High** sets the machine's modem speed at 33,600 bps. (For some models)
- **Modem** sets the machine's modem speed at 14,400 bps.
- **Basic (for VoIP)** sets the machine's modem speed at 9,600 bps.

PHP

From Wikipedia, the free encyclopedia

PHP is a server-side scripting language designed for web development but also used as a general-purpose programming language. PHP is now installed on more than 244 million websites and 2.1 million web servers.[2] Originally created by Rasmus Lerdorf in 1995, the reference implementation of PHP is now produced by The PHP Group.[3] While PHP originally stood for *Personal Home Page*, it now stands for *PHP: Hypertext Preprocessor*, a recursive acronym.[4]

PHP code is interpreted by a web server with a PHP processor module which generates the resulting web page: PHP commands can be embedded directly into an HTML source document rather than calling an external file to process data. It has also evolved to include a command line interface capability and can be used in standalone graphical applications.[5]

PHP is free software released under the PHP License, which is incompatible with the GNU General Public License (GPL) due to restrictions on the usage of the term *PHP*.[6] PHP can be deployed on most web servers and also as a standalone shell on almost every operating system and platform, free of charge.[7]

Why do VoIP providers tell you to disable ECM mode? ECM is actually desirable because it ensures delivery of a perfect fax image If you turn it off, sometimes when the internet connection is getting borderline bad, the fax machine will often say "Complete", "Success", etc even through some pages may be cut in the middle or lost or blank entirely ECM mode is like "never give up" mode - So on a borderline bad internet day the fax might take much longer than usual because of retransmission of the image areas that were in error - but the fax will "Complete", and it really will be complete and 100% error free Without ECM mode, it's a pure gussing game whether your pages were received OK or not

Unfortunately on many machines you can't set the baud rate independently of the ECM setting Like "Overseas mode on/off" or "compatibility" settings that when enabled will reduce baud rate and turn off ECM So you have to give up the assurability of ECM mode just to reduce the baud rate Just leave those alone or default most of the time. Also I would like to note that as far as modem reliability goes, 9600 vs 14400 baud rate isn't really all that far apart It shouldn't make a difference most of the time

In my testing I have found that indeed ECM mode is generally more successful While sometimes no ecm + 9600 will sometimes trick you because that pages were actually lost or blank It turns out that ECM mode is very robust It can even recover from large gaps in the audio stream - like gaps of several seconds long whereas non-ecm will just cut the page off at that point The thing that causes pages to go completely missing is caused by high network jitter and packet loss - causing many little audio glitches strewn about so that no image data can be recovered at all producing a blank page In ECM mode it will just take a lot longer than usual, because those areas are re-transmitted again and again until it's right But it will succeed with an error free image in the end

Note This fax is living proof Sent Via VoIP @ 14400 with ECM mode No T 38 or any trickery

What is DIR®?

The DIR®/Floortime™ Model is a framework to assist parents and professionals in constructing a comprehensive program that focuses on improving the child's functioning in all the developmental capacities where these are challenges, and, at the same time promoting healthy overall emotional and intellectual functioning. Jake and Tim have extensive experience working with families and collaborating with professionals in a variety of settings.

Since starting DIR® Support Services, Jake and Tim have worked with over 500 families and have presented at workshops around the country. Their ongoing goal is to provide services for families with children with special needs and to educate and promote the use of the DIR® model.

Chapter Three

6. What do we learn about Unoka in this chapter? How are Okonkwo's behaviors and values influenced by his father?

   A. They are completely different. He wants to be the complete opposite of his father because he wasn't successful. Okonkwo is impatient for lazy people and works hard on the fields.

7. Look up the term "subsistence farming" on the internet and discuss how it relates to the village of Umuofia. Why is this type of life fraught with danger?

   A. Subsistence farming is to farm for survival. It is growing crops for food and animals for cloth. It is only enough to keep the family alive. The crops can fail and there will be no food for the families.

Chapter Four

8. On the top of page 27 we are told the reason Okonkwo's actions using metaphor. Explain what the metaphor means and evaluate if it is true based on what we know about Okonkwo.

   A. [illegible]

9. Do you agree that "Okonkwo was provoked to justifiable anger by his youngest wife"(29)? If so, was his response justified? What does this tell you about the culture of Umuofia?

   A. I disagree with Okonkwo's actions because he got mad over one small mistake and his response, beating, was not the justified response. This tells me that in their culture beating is allowed when mistakes are made.

10. We are told that "[Unoka], [Okonkwo] was convinced. But he was not the man to go about telling his neighbors that he was in error" (31). Evaluate this aspect of his character. Is it good for him? For his family? For his community?

    A. He doesn't like to apologize for the actions he has committed. This is not good for him neither his family, and his community. This has a good for him because his pride will be taken away. It is not good with his family because they will have a bad family relationship. And it is not good for the community because they might think of him as a different and bad person.

Chapter Five

11. Okonkwo prays to his ancestors and asks them to "protect Ezinma, his children and diseases in the new year" (39). Why can this be considered ironic and, perhaps, even hypocritical?

    A. This is kind of ironic because in the story we only see Okonkwo hating on his family for being lazy or beating of kids or wife

Invest in Your Future

Women are more financially independent than ever before, but you still need to prepare for financial challenges

While you may share financial goals similar to men's, you need to approach investing differently, so your journey toward those goals may take a different route.

Reasons for Optimism

1. Women are surpassing men in college degrees.[1]
2. Woman-owned small businesses are growing twice as fast as those owned by men.[2]
3. An increasing number of wives are out-earning their husbands.[3]
4. Women tend to be better investors than men.[4]

Challenges

1. Women still earn less than men.[5]
2. Women spend less time in the workforce to provide care for children and parents.[6]
3. Women often outlive men, so their money needs to last longer.[7]
4. Women tend to be less prepared for retirement.[8]

Knowing the challenges you face and the opportunities available to you can help you proactively build a solid financial future.

Half hours with famous Mahatmas | Vol 1 No 3

YOGI MAHATMA SRI AGAMYA PARAMAHAMSA GURU SWAMIJI is a certain Punjabi late who on account of his tremendous voice and ferocious temper has well earned for himself the name of The Tiger Mahatma

My first acquaintance with His Holiness was in November 1906, when he paid his second visit to England. I had seen his name in the daily press but before calling upon him I had read up what I could about him in his books "Sri Krishna Utpatti" in the preface of which he is praised as follows.

"He seeks to do good, he accepts money from no one and lives a very simple pure life I was much impressed by his great breadth of mind, his sweet charity, and his loving kindness for every living thing These teachings ... breath love and kindness and dwell upon the joys of pure clean living."

Forewarned is no forearmed, and I had read the same type of "puff" on many a patent pill box!

On entering 70, Margaret Street I was shown upstairs and ushered into the den of Tiger Sri Agamya Besides himself, there were three people in the room, two men and [284] a woman, and as I entered one of the men, an American, was saying:

"O Maharaj! I haven't the faith, I can't get it!"

To which His Holiness roared out:

"You sheep and — I no want sheep! — upon I wake — tiger tear up sheep, go and l... e good, get intellect — get knighthi — no more!"

The three then departed, and I was left alone with the Blessed One. Neither of us spoke for about ten minutes, then at length, after a pu or two at his snuff box, he gave a loud grunt, to which I replied in a solemn voice

"O Maharaj, what is Truth?"

"Bos Tzuhli All illusion" he answered "I am that Master you become my disciple I show you all things I lead you to the ultimate real re the supreme stage of the highest the infinite Ultimatum the unlimited immanence of eternal Wisdom All this I give unto if you have faith in me."

As faith is exceedingly cheap in this country I offered him unlimited oceans of it and at that he seemed very pleased, and laughed

"Ha! ha! You make good tiger cub — you tear sheep up — all a illusion! Then after a pause "De vivarium, pointing to the door, "is no good!" And the, without further beans ado, he entered upon a veritable Don Juan description of his earthly adventures This I thought strange of so sober-minded a saint, and so put to him several questions concerning the Vedanta Philosophy, and as most noted exponents it was what he really did know

"Do you know Swami Vivekananda?" I asked [285]

ALLEN CARR'S EASY WAY TO STOP SMOKING

WHAT OUR READERS SAY ABOUT THE ALLEN CARR METHOD

I was exhilarated by a new sense of freedom! Independent. An instill gent and magical method. I cannot Standard

WHAT UNPUBLISHED PROFESSIONALS AND MEDICAL PRACTITIONERS SAY ABOUT THE ALLEN CARR METHOD:

[illegible] use some of his techniques, but it would appear few do so in quite such a successful package. A personal vote from [illegible] Director [illegible] Consultant [illegible] Tobacco Control [illegible] for Health Organisation [illegible] Royal College of Physicians of Health

It is a remarkable fact that Allen Carr, on his own admission a non-professional in behavior modification, should have succeeded where countless psychologists and psychiatrists holding postgraduate qualifications have failed, in formulating a SIMPLE and EFFECTIVE way to stop smoking.

Dr William Green [illegible] of the Psychiatric Department, Matilda Hospital, Hong Kong

I was really impressed by the method, in spite of Allen Carr's success and fame. If one were to generalise and the professional approach was something a GP could really respect. I would be happy to give a medical endorsement of the method to anyone.

Dr P. M. Bragg

I have observed the Allen Carr method. The Easy Way to Stop Smoking at the Harrow Clinic on several occasions. I have found it to be very successful. I wholeheartedly support it as an effective way to stop smoking.

Introduction

This document will assist you in testing your HP Fax machine using the HP FaxTest Service.

Print this document for easy reference by clicking the Printable Version link in the upper right corner of this page.

Test your fax machine

To test the capability of your fax machine, follow the instructions below.

NOTE: Be sure that your phone number is not Caller ID blocked by your telephone company prior to attempting to send and receive a fax. Pressing *82 before dialing the fax test number will unblock the Caller ID for dialing the fax in most areas. Other phone company services that prevent you from receiving a fax, including voice mail, call blocking, or call privacy features

NOTE: Where we have left wording in brackets, this is good practice in the Automatic Reports option in the printer's fax setup menu for fax. This way, even if the test facility or error codes will be generated the test guide you in future troubleshooting. This option is available in different places on different products, consult the product User's Guide for page guide steps

1. Send a one page blank document with the **1-888-473-2963** fax number (1-888-473-2963)
2. When your fax is received by the HP Test Fax Service, we will generate a return fax to you within the minutes confirming that we received your fax. This confirmation fax will be sent with send and receive data with your fax machine.

If you do not receive a return fax within 5-7 minutes, there may be a problem with the setup of your fax solution. Consult the owner's manual that came with the printer for proper setup and configuration.

NOTE: The most common cause of failure is that the fax number is not entered correctly on the machine does not match the number of the phone line connected to the fax. Also ensure that the fax header contains the full 10-digit telephone number of the fax machine, including the area code.

The intern approaches one bedridden patient and asks, "Why are you here?" The patient replies, "Wee sleket cowerin timmrous beastie/O what a panic is in thy breastie."

The intern moves on to the next bed and asks the same question. "Why are you here?" The patient answers, "O my luv is like a red, red, rose that's newly sprung in June."

Minnesota Waters

Minnesota Waters is a program of Conservation Minnesota

Welcome to Minnesota Waters!

In May of 2012, two non-profits devoted to protection of our state's lakes, rivers and natural resources, Minnesota Waters and Conservation Minnesota, reached agreement to continue their work as one organization. This exciting merger has created a stronger foundation on which to continue the common work of these two organizations. That work is focused on engaging people in protecting the lakes and rivers that define life in Minnesota.

Today, Minnesota Waters is a program of Conservation Minnesota. Our goal is to provide half-highest quality information and services. First and foremost, our work will continue to center on engaging Minnesotans and helping them make a difference.

This website contains valuable information for people concerned about protecting lakes and rivers. Most important is a listing and link to the state's vibrant network of lake associations and river organizations who are on the front lines of protecting Minnesota's most cherished places.

Please don't hesitate to contact us with your questions or concerns. Together we can forge a new tradition of stewardship for our more than 12,000 lakes and the headwaters of three great river great river systems.

Testing Your HP Fax Machine with the HP Fax Test Service

Print Share Feedback

Introduction

This document will assist you in testing your HP Fax machine using the HP Fax Test Service. Print this document for easy reference by clicking the **Printable Version** link in the upper right corner of this page.

Test your fax machine

To test the capability of your fax machine, follow the directions below.

NOTE: Be sure that your phone number is not Caller ID blocked by your telephone company prior to attempting to send and receive a fax. Pressing *82 before dialing the toll free number will unblock the Caller ID blocking feature in most areas. Other phone company services can prevent you from receiving a fax, including voice mail, call blocking, or call privacy features.

NOTE: Whenever troubleshooting a fax issue, it is good practice to set the Automatic Reports option to **Every Error** before attempting a test fax. This way, even if the sent fax fails, an error code will be generated that will guide you in future troubleshooting. This option is available in different places on different products, consult the product User's Guide for specific steps.

Refund. Even if you do not have to file a tax return, you should file to get a refund if box 2 shows federal income tax withheld or if you can take the earned income credit.

Earned income credit (EIC). You must file a tax return if any amount is shown in box 9.

You may be able to take the EIC for 2010 if (a) you do not have a qualifying child and you earned less than $13 460 ($18 470 if married filing jointly), (b) you have one qual fying child and you earned less than $35,463 ($40,545 if married filing jointly) or (c) you have two or more qualifying children and you earned less than $40,363 ($45,372 if married filing jointly) or (d) you have three or more qualifying children and you earned less than $40 197 ($43,352 if married filing jointly). You and any qualifying children must have valid social security numbers (SSNs). You cannot take the EIC if your investment income is more than $3 100. **Any EIC that is more than you owe for taxes is refunded to you but only if you file a tax return.** To figure whether you qualify, the IRS can help you as much as $1 830 of the EIC in advance by completing Form W-5, Earned Income Credit Advance Payment Certificate, and giving it to your employer.

Thanks you for co[illegible] like to see [illegible] landscaping in your new divisional headquarters. We're pleased to [illegible] proposal herewith for the concept phase as agreed earlier

Since your available area is somewhat limited, we suggest a modular layout This concept emphasizes space conservation and yet still provides for a modern pleasing atmosphere.

Enclosed are two floor plans. The first one will allow you to keep your present furniture The second was designed with the intention that our new space-saving modules be used Notice that the latter will provide for more spacious accommodations and/or room for additional personnel Also included are the specification sheets on these products.

After you have had a chance to study our ideas I would like to set up a meeting during October to discuss any further refinements I will have my secretary make the arrangements Please call me in the interim if you have any questions

17 原本的卧室
这间衣服用品室直达古朗姆被停复。地砖是原来就有的 不过未制与与木管则是圆源改装所置前的。

18 古物学系员办公室（曾Lizzie的房间）
如原来可能是Elizabeth Harvey的卧室 Elizabeth是Dunsmuir的告管 这间房间原是古物室系所来得管 研究与室记就置换七千多件古物的地方。

升降机 在古物室系员办公室（18）与侍人卧室（19）之间的墙建有一座升降机。这座室闭的上层与这升降机被用来运输下室 室房与底层被用之间运输物品。不过原室已经无法使用 目前的升降机被 电机系统和原置在升降机的室外室。
钟表古物馆藏 两间进入层室这的的特殊古物馆藏可以直达地下室

19 侍人卧室 这座设是住在城堡室的侍人所使用的室。这位这间房间是作为指长办公室。

城堡的入如识

- Craigdarroch是苏格兰最尔雷的「参石为城堡称」的意思

20. 餐室
餐室 这里是邓姆斯时代的餐室。食物会用电室汽梯送餐室室并从取厨室用升降机运上来。现在这室不是可以看到海岸升降机部下的观景。1905年 哈奥森由Dunsmuir女士的客户计师设计为「第四个卧室」，不过房屋并没有室好与装护 所以期间设计不是卧室，或许这室是Dunsmuir家属用作为更衣室或储藏室的室间。

Craigdarroch军医室

第一次世界大战之后 加拿大军事一些钟楼的医院来照顾那些在战场上负伤的军人。Craigdarroch城堡是加拿大政府所设立的二处用来收容「重要长期治疗或无法被遣的病」的地点其历之一 从1919年的3月25号，Craigdarroch军医院由威尔斯王子（后来的爱德华八世）剪彩并开始运作

21 男士厕所
这室本是Dunsmuir家的厕所 目室则是公用厕所。

22 Maud的卧室
这就间是和较的Henrietta Maud Dunsmuir的房间，本头室中室是根据这室内其他室中室原设计的室例室。只室室例的费用高昂 但这可以避免这室的古物室光线而损坏 例如这已由室属者修复的1895年壁纸室印象。

23. 佣具储藏室
这个由拼装柏木（Cedar）板所建筑的室间原设是保具储藏室

24 佣人起居室 或许是佣人管家的起居室 而且管家可能偶而做个房间（#24与#25）。

25. 佣人卧室 或许是佣人管家的卧室 这里目前是一群每周固去回个时以上的天工的杂必室。

《《《《 请先后面的楼梯到一楼继续参观 》》》》

FIRST FLOOR —1

26. 受验室
彩色玻璃室上被加了室英国推广原室的Walter Raleigh室（1552-1618）。

27 早餐室
Dunsmuir家族或许是选这个由被软木所装的房间室为用早餐，原因如室室的彩色玻璃原设是被盖室室由色的彩色玻璃了。

28 办公室（原型厨室）
驼圆室设为有先全保室 目前作为其工与又工作办公室，这是原先正常是用做厨放被加室不室在上室厨室原后来的地方，这室有另外两个门可以通到餐厅厨房与每具走廊室

地下室 驼圆室在此通往的门可以通往地下室的具工办公室。地下室只有三分之二的室内的天花板室高以供使用 一般室里用来作为杂计室 储藏室 厨放备用室电机 消防器水器与燃油热水室等。

29. 礼品店（原图房）
这里曾经有两个房间 一间图书与一间餐具走廊室，并有一条通到外面的走廊 走廊的墙已被拆除 而这墙被木具室内的讯室所填墙 你可以在天花板上看到原本图书墙图的痕迹 墙上也有一图拖墙了原来图书馆所留的墙面。 礼品室所有的室收的用于设有Craigdarroch联盟的用途。

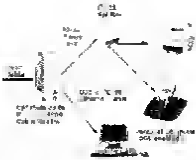
Optimum Voice: Connect My Fax Machine

IG 579

There are many choices on how you can connect your fax machine to your Optimum Voice line. Choose the one that is right for you.

- Use the phone connection next to your computer. An extra phone cable connects your fax machine to the phone connection next to your computer. This is the easiest option.
- Use the phone connection next to Optimum Voice cable modem. Using a new phone cable, connect your fax machine to the second phone connection on the modem. (See picture below.)

  Please note: Your fax machine will only work properly if it is connected directly to the modem. Do not connect your fax machine to a splitter or any other phone devices.
- Connect your fax machine directly to an available phone jack on your optional Voice modem (if any).



The Optimum Voice modem supports fax speeds up to 14.4 kbps, which is typical of most group 3 fax machines manufactured today.

A HOLE IN THE ROOF Skylights are often installed after original construction, and installation can be tricky. In addition to cutting a hole in the roof, (and the structural considerations involved) leakage must be prevented around the sky light. The skylight should have a flashing detail that makes a good watertight connection between the roof and the skylight. Poor installations are common.

Skylight and solarium leaks
skylights are common but can create a leakage
through improper installation through the flashings or at
the edges of the glass
skylight
leakage

Common Problems with Skylights

LEAKS Leakage is a common problem often a result of poor installation rather than a poor quality fixture. It may be difficult to identify the leakage source without dismantling the system. Low quality and poorly installed skylights are very common and most skylights leak at some point.

OTHER PROBLEMS Skylights have the same issues as windows with respect to cracked panes, lost seals, condensation rot and mechanical damage.

6.3 Solariums

DESCRIPTION Solariums have walls and a roof made mostly of glass. They are also called sun rooms, Florida rooms, plant rooms and greenhouse rooms. The framing for the solarium may be wood, metal, vinyl or a combination, and the glazing may be glass or plastic. Glass used in anything other than a vertical plane should be strengthened by tempering or laminating. Glass used in roofs may have to withstand a falling tree branch or hailstones, for example.

Solariums are inherently difficult to heat and cool, due to the large glass area and absence of insulation. Comfort issues are common in solariums.

COOLER FREEZE-UP PROTECTION

WARNING

Overheating of the water heater can be hazardous and can result in property damage, personal injury or death. Do not operate the water heater unless all of the water is filled and purged from the system. Failure to do so may result in overheating and damage to the water heater.

The water heater is NOT designed to operate as a boiler. Do not operate the water heater at water temperatures that exceed the temperature of boiling water. Do not operate the water heater at pressures that exceed the pressure rating.

Water heaters require no maintenance. However, periodic inspection of the water heater is recommended to ensure that all of the required items listed in this manual are being followed.

HEATER CABLE — Optional

Self-regulating heater cable is available for protecting the water heater from freezing. The heater cable should be installed by a qualified electrician in accordance with all applicable codes and ordinances. Failure to properly install the heater cable may result in property damage, personal injury or death.

CAUTION

Do not install heater cable on copper pipe. Heater cable may cause copper pipe to overheat and fail.

Heater cable must be installed directly on the cold water inlet pipe and the cold water supply pipe. Heater cable should not be installed on the hot water outlet pipe or the recirculation pipe.

Heater cable must be installed directly on the pipe. Heater cable should not be installed on the insulation or the outer jacket.

Heater cable must be installed in accordance with the instructions provided with the heater cable.

Heater cable must be plugged into a ground fault circuit interrupter (GFCI) protected outlet.

Thermostats — Optional

Two thermostats are required for the water heater to be properly protected from freezing. The cooler thermostat (part no. 44-102-157-995) is set at 40°F (4°C) and is wired in the temperature sensing circuit. The 40°F thermostat is installed on the cold water inlet pipe. The thermostat is installed on the pipe with the sensing bulb in direct contact with the pipe. The thermostat is wired in series with the heater cable and the power supply. The 40°F thermostat will turn the heater cable on when the temperature of the cold water inlet pipe reaches 40°F (4°C). The heater cable will remain on until the temperature of the cold water inlet pipe reaches 50°F (10°C).

The colder thermostat (part no. 44-102-157-996) is set at 20°F (-7°C) and is wired in the temperature sensing circuit. The 20°F thermostat is installed on the cold water inlet pipe. The thermostat is installed on the pipe with the sensing bulb in direct contact with the pipe. The thermostat is wired in series with the heater cable and the power supply. The 20°F thermostat will turn the heater cable on when the temperature of the cold water inlet pipe reaches 20°F (-7°C). The heater cable will remain on until the temperature of the cold water inlet pipe reaches 30°F (-1°C).

Thermostat Wiring — Optional

1. Disconnect the power supply to the water heater.
2. Remove the upper access panel from the water heater.
3. Locate the cold water inlet pipe and the cold water supply pipe.
4. Install the 40°F thermostat on the cold water inlet pipe. Ensure that the sensing bulb is in direct contact with the pipe. Secure the thermostat with the mounting clip.
5. Install the 20°F thermostat on the cold water inlet pipe. Ensure that the sensing bulb is in direct contact with the pipe. Secure the thermostat with the mounting clip.
6. Connect the 40°F thermostat in series with the heater cable and the power supply. Use the wiring diagram provided with the heater cable.
7. Connect the 20°F thermostat in series with the heater cable and the power supply. Use the wiring diagram provided with the heater cable.
8. Install the upper access panel on the water heater.
9. Restore the power supply to the water heater.

Pressure Transducers — Optional

The water heater is equipped with two pressure transducers. One is located on the cold water inlet pipe. The other is located on the hot water outlet pipe. The pressure transducers are used to monitor the water pressure in the water heater. If the water pressure in the water heater exceeds the maximum allowable working pressure, the pressure transducers will send a signal to the control board. The control board will then shut off the heater cable to prevent damage to the water heater.

TROUBLESHOOTING — Pressure Transducers

If the water heater is not heating properly, check the following:

1. Check the power supply to the water heater. Ensure that the power supply is turned on and that the circuit breaker is not tripped.
2. Check the heater cable. Ensure that the heater cable is properly connected to the control board.
3. Check the pressure transducers. Ensure that the pressure transducers are properly connected to the control board.
4. Check the water pressure in the water heater. If the water pressure is too high, the pressure transducers will send a signal to the control board to shut off the heater cable.
5. If the water pressure is too high, check the pressure relief valve. The pressure relief valve may be stuck open or may be leaking.
6. If the water pressure is too high, check the expansion tank. The expansion tank may be waterlogged or may have a leak.
7. If the water pressure is too high, check the water supply. The water supply may be too high.
8. If the water pressure is too high, check the water heater. The water heater may be too small for the application.

Chilled Water Flow Switch — Optional

A flow switch is also available for the chilled water circuit. The flow switch is installed in the chilled water return line. The flow switch is wired in series with the heater cable and the power supply. The flow switch will turn the heater cable on when the chilled water flow rate reaches the minimum flow rate. The flow switch will turn the heater cable off when the chilled water flow rate falls below the minimum flow rate.

Install efficient showerheads

Showering accounts for about 40% of your hot water use, but you can cut costs without sacrificing comfort.

If your shower fills a 5-gallon bucket in less than 20 seconds, you could save with an efficient showerhead. These showerheads, with flow rates no greater than two gallons per minute, help reduce hot water use while maintaining water pressure.

Yes, you can realize significant savings with efficient showerheads, especially if you have a large household.

Frequently asked questions

Why am I receiving these reports?
We want to help you save energy and lower your bill, and have randomly selected you to receive these reports.

Who am I being compared to?
Nearby homes with a similar square footage, building type and heating fuel type—the three most important factors affecting energy usage. Homes in your comparison are not necessarily next door or even down the street. We encourage you to contact us to confirm that your home profile information is correct.

What if I have special circumstances that impact my energy usage?
We can't account for household differences such as guests visiting or working from home, so we leave your comparison to those three major factors that drive energy consumption to provide a helpful benchmark.

AMATEUR RADIO LICENSES AND REQUIREMENTS

In the US, there are three Amateur Radio license levels, or license classes which are Technician, General and Amateur Extra. The Federal Communications Commission (FCC) grants these licenses. The exams cover regulations, operating practices, and electronics theory. They are based on cumulative knowledge and build off one another. FCC requires the lower level exams to be passed for the higher level licenses to be issued.

LEVEL 1 **Technician Class**
EXAM: 35 question Technician Written Exam (Element 2)

LEVEL 2 **General Class** (upgrade from Technician)
EXAM: 35 question General Written Exam (Element 3)

LEVEL 3. **Amateur Extra Class** (upgrade from General)
EXAM: 50 question Extra Written Exam (Element 4)

The written examinations are constructed from question pools that have class made public. There is no examination from the written exam requirements for persons with difficulty in reading, writing, or because of a handicap or disability. There are exam accommodations that can be affirmed examinees. To view the question pools and other useful information or to contact an FCC approved VEC organization visit: **www.ncvec.org**

FCC CONTACT INFORMATION

Should you have any questions, please contact the FCC at 877-480-3201 (weekdays), or visit the FCC website at **https://www.fcc.gov/wireless/bureau-divisions/mobility-division/amateur-radio-service**

SOCIAL SECURITY NUMBER

Under the Debt Collection Act of 1996 your Taxpayer ID Number (TIN) which is your Social Security Number is required on the application – or your FCC-assigned Federal Registration Number (FRN). An FRN is assigned by the FCC registration system as soon as your SSN is registered. Visit FCC CORES FRN Registration at **https://apps.fcc.gov/coresWeb/publicHome.do**

NCVEC FORM 605

The NCVEC Form 605 is for VE / VEC use only. Do not send or provide the form to the FCC. This form is used at a VE exam session to apply for a new or upgrade Amateur Radio Operator/Primary Station license. It may also be used to renew or update your license (change your mailing address, email address, name etc.). The form may not be used to apply for a new specific "Vanity" please call sign.

THE FCC APPLICATION FORM 605

The FCC Form 605 may not be submitted to a VE exam session class or a VEC a race if does not request the information required by the administering VEs. The FCC Form 605 may be used to renew or modify your license. New vanity license requests and sequential call sign changes require an FCC schedule D form in addition to the FCC 605 Form. Send the FCC 605 form to: FCC, 1270 Fairfield Rd. Gettysburg PA 17325-7245. You may file license renewals or changes or request a vanity call sign online directly with the FCC at **http://wireless.fcc.gov/uls/**

FCC BASIC QUALIFICATION QUESTION

This item enables the FCC to determine whether an Applicant is eligible under §§ 310(d) and 308(b) of the Communications Act of 1934, as amended, to hold or have ownership interest in a station license. Applicants are required to answer the question only if 1) they are filing NCVEC or FCC Form 605 for one of the following purposes indicated: **New; Amendment, Modification (Upgrade or Call sign change), or Renewal/Modification** and 2) the answer has changed from the answer previously provided. Applicants using NCVEC or FCC Form 605 for any other purpose are not required to answer this question.

FCC BASIC QUALIFICATION QUESTION INSTRUCTIONS AND PROCEDURES WHEN ANSWERING "YES"

If the answer to the basic qualification question (felony question) is "YES" submit as an exhibit a statement explaining the circumstances and a statement giving the reasons why the Applicant believes that grant of the application would be in the public interest notwithstanding the arrest or alleged misconduct. If the Applicant responds "YES" to this question and has previously provided a statement and explanation regarding the circumstances as an attachment to a prior application filed in ULS and the facts and circumstances are unchanged, the Applicant may refer to the previous application by identifying the application file number and indicating the disposition of the prior application. Find your FCC Application file number **http://wireless2.fcc.gov/UlsApp/ApplicationSearch/searchAdvance.jsp**

Applicants can send the explanation and the application file number via e-mail to: **attachment@fcc.gov** or **via postal mail to: FCC 1270 Fairfield Rd Gettysburg, PA 17325 7245**
The applicant is required to provide an explanation **within 14 days of the application date is being submitted to FCC**. Failure to do so may result in the application dismissal without action. The applicant must provide sufficient information for the FCC to determine whether there exists any material and substantial question of fact regarding whether the applicant has the character qualifications to be a Commission licensee. There is no set checklist of items, but useful information includes:

- a detailed description of the conduct that resulted in the conviction or guilty plea, including time and place of the acts of the conviction or guilty plea.
- the punishment that was imposed and whether the sentence has been completed or the applicant is still under any restriction or condition resulting from the conviction or guilty plea
- any actions taken to remedy the wrongs committed and ensure that the applicant will not engage in such conduct in the future.

If the applicant does not request confidential treatment, the explanation will be publicly viewable in ULS. If the applicant requests that the explanation be confidential it will not be visible to the public. However, in order to seek confidential treatment, the applicant must include a separate request that the materials not be made available for public inspection. The request must contain a statement of the reasons for the request, and identify the portion(s) of the response for which confidential treatment is requested. It is not sufficient to simply mark a document as "Confidential." All attachments, confidential or non-confidential, should be accompanied by an application file number to ensure that the application is attached to the proper filing.

Evan as you can see the lighting is improved from the last check, but you still have issues in the middle parking isle and the drive areas, especially in front of the store Recommend two new poles be installed and change out the canopy lighting to something brighter

Nothing Else Matters

So close no matter how far
Couldnt be much more from the heart
Forever trusting who we are
And nothing else matters

Never opened myself this way
Life is ours, we live it our way
All these words I dont just say
And nothing else matters

Trust I seek and I find in you
Every day for us something new
Open mind for a different view
And nothing else matters

Never cared for what they do
Never cared for what they know
But I know

So close no matter how far
Couldnt be much more from the heart
Forever trusting who we are
And nothing else matters

Never cared for what they do
Never cared for what they know
But I know

Never opened myself this way
Life is ours, we live it our way
All these words I dont just say
And nothing else matters

Trust I seek and I find in you
Every day for us something new
Open mind for a different view
And nothing else matters

Never cared for what they say
Never cared for games they play
Never cared for what they do
Never cared for what they know
And I know

So close no matter how far

Dear Parents

We are pleased to inform you that school supply lists for elementary and middle schools have been reduced and standardized county wide by grade In addition and for your convenience Cecil County Public Schools has arranged with OfficeMax to allow parents the option of purchasing most school supplies online at the same discounted rate used by CCPS This feature has been provided as a convenience to parents

You can access supply list information by following the steps below

1 Access the Cecil County Public Schools website at www.ccps.org
2 Click on the tab labeled *Parents* and select *School Supply Lists* from the dropdown menu.
3 This will take you to the School Supply List webpage where you will be able to view grade level lists and review directions for online OfficeMax orders.

As you will read in the directions to access the online orders, most of the items on the standardized lists are already available for selection on the OfficeMax website. This will allow parents to purchase the full list of items offered by OfficeMax or select individual items

While we are excited that our partnership with OfficeMax has allowed for a new convenience and cost-savings opportunity for parents there is certainly no obligation for parents to buy the supplies from OfficeMax Should you choose to purchase from OfficeMax and have any questions regarding the online ordering system, please use the OfficeMax Customer Service number referenced in the directions we have provided on the website

Sincerely,

D'Ette W Devine

"Finally, in order to best prepare the coordinator for the call could you tell me.

1) *Do you have a corporate responsibility program in place or green team?*

2) *Do you own or lease your property? Either situation is eligible for participation in the program.*

3) *This program requires a commitment to regular maintenance from your staff and/or landscape contractor to ensure successful projects. Is this feasible?*

Thank you for your time today and for taking my call"

BACKGROUND ON CREDIT VALLEY CONSERVATION (CVC)

Credit Valley Conservation (CVC) is a community-based environmental organization, dedicated to protecting, restoring and managing the natural resources of the Credit River Watershed.

CVC was established by the provincial government in 1954, and is one of 36 Conservation Authorities in Ontario.

Credit Valley Conservation head office is based in, Mississauga, Ontario, Canada

WEBSITE: http://www.creditvalleyca.ca

OBJECTION RESPONSE

1. **We lease.**

   Either situation is eligible for participation in the program. You will require permission from landlord if you lease and our experience is that they sometimes cover costs of plant materials.

2. **Cost.**

   We work with whatever budget you have. There is no cost for our program services (we are funded by the Region of Peel) the you will have to cover the cost of plants and any other construction materials. Non-profit organizations may be eligible for funding and we can provide a list of funders ie TD Friends of the Environment.

3. **Not enough green space**

   We can work with any size space and can recommend environmental solutions for paving, walls and roofs i.e. permeable paving and parking islands, green walls and roofs

...will reduce lost disk space due to slack, and will reduce defragmentation times on partitions containing many relatively-static data. (For much more on the issues involved in partitioning.) So instead, let's say you want to split up this drive as follows:

- One 8 GB primary partition for Windows and other operating system and program files.
- One 12 GB partition for data.
- One 16 GB partition for games.
- The rest of the disk in a 24 GB partition for large multimedia files, short-term backups, and future expansion.

I'm assuming no complicating factors here, just a simple example. To do this, you will first set up a primary DOS partition 8 GB in size. That is the first of your four partitions. You will then create an extended DOS partition that is 52 GB in size. This is the second partition on the hard disk. Within the extended DOS partition you will create three logical volumes: one 12 GB, one 16 GB and one 24 GB. These are your second, third and fourth volumes (logical partitions). The first partition will be your C: drive, from which you boot the machine, and DOS will normally assign D:, E: and F: to the other three logical partitions. Your hard disk will have one primary DOS partition, and one extended DOS partition containing three logical DOS volumes.

Graphical depiction of the partitioning of a 60 GB hard disk as described in the example, above. Each square represents 1 GB of space on the hard disk. The blue squares are the 8 GB primary partition, the green, red and purple squares are the 12 GB, 16 GB and 24 GB partitions respectively. The latter three partitions are logical partitions contained within an extended DOS partition, indicated by the larger gray-shaded rectangle.

Once the system is set up, there is no functional difference between these partitions other than the fact that C: is the only bootable one and is where all the DOS system files reside. Regular files can reside wherever you want them to.

Presumably, you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both

To test the send functionality of your fax machine, send a one-page fax to 1-855-330-1239 (a toll-free number in the United States.) When it's finished transmitting, point your web browser to Fax Toy --- it's a fun web site that displays whatever is faxed to that number. Within a minute your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero thus site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully, it will automatically answer and spit out the test fax

results of this study should be interpreted in the context of all clinical and laboratory findings. As therapeutic options should be taken based solely upon these results. A "Not Detected" result may indicate the presence of an EGFR mutation below the detection limit of this assay. KRAS, MET and ALK mutations also affect the effective treatment of patients with NSCLC and should be considered by treating physicians. KRAS mutations are associated with increased resistance to TKIs affecting the downstream pathway. MET mutations are associated with increased resistance to TKIs by providing an alternate from T790M resistance. ALK mutations are indicative of an increased sensitivity to ALK inhibitors.

ADS now uses the **Automated Dispatch System (ADS)** for taking your service calls. This system offers many advantages over conventional call handling systems.

- **No Hold Time** - you never have to wait to hold to place an Automated Service Request!
- **Speed and Convenience** – you can place your call in about one minute 24 hours a day, 7 days a week.
- **Accuracy** – Your Service Technician hears your description of the problem in your voice
- **Fax-Back Confirmation** - You may request a fax confirmation of your call with a confirmation number

Of course, you may speak to a live Dispatcher any time by pressing 0.

Placing a call using our Automated Dispatch System

Have your **Equipment ID Number** ready

Call our service number at **(888) 888-8888**

1. When the Automated System answers **press 1** to leave an Automated Service Request.

2. You will hear several prompts, asking you to speak items such as **Equipment ID, Company Name and Address, Contact Name and Phone Number** and a **Detailed Service Message**. Follow the prompts and press * after you have completed speaking each item.

3. Once you have completed your recordings, you have the option to **Listen, Append** or **Save** your message. Press # if you wish to save your message and continue.

4. You are then prompted to receive a **Fax Confirmation**. Press **1** for **YES**. Press **2** for **NO**
- If you choose YES, you are prompted for a fax area code and number
Use the buttons on your phone to enter your fax number followed by the * key
- The system will speak your fax number back to you and ask the verifications.

5. When you have completed these steps, the system will respond, "**Information accepted**" and return to the Dispatch Service Menu. You may hang up or choose other options if you wish.

Thank you for choosing

KEEP YOUR BRAIN YOUNG BY STAYING FIT

Exercise can't prevent Alzheimer's, but it can cut the risk in half

BY ELISABETH ASHVALL

Sudoku. Crossword puzzles. Computer training. Half of Americans believe these games and mental tasks keep their brains healthy, according to a 2014 AARP survey—but there is little evidence that they do. If you really want to retain mental clarity and improve your odds of staving off dementia, researchers say, hit the gym.

In the past decade, scientists have begun to understand the crucial relationship between exercise and brain power. Just as exercise helps keep muscles strong, blood vessels flexible and stress low, it also enhances mental abilities, stops brain shrinkage and promotes the formation of new neurons.

Studies even suggest that people who are physically active "have lower rates of Alzheimer's and other age-associated neurodegenerative disorders," says Arthur F. Kramer, senior vice provost for research and graduate education at Northeastern University in Boston and an expert on exercise and the brain.

A BIGGER, YOUNGER BRAIN

As we age, the hippocampus—an area of our brains that is key to memory—shrinks, leading to memory problems and possibly dementia. Research by Kramer and others showed that when previously sedentary men and women 55 to 80 years old walked around a track 40 minutes a day three times a week for six months, their hippocampi actually increased in size. A control group that did not walk had smaller hippocampi than when they started.

Another study of nearly 900 men and women with an average age of 71 found that those who had exercised moderately or vigorously over five years—jogging, hiking, swimming, dancing—performed on a par with someone a decade younger on tests of memory and other brain skills.

These studies support the prevailing theory that heart health and brain health are linked. Regul prevent high blood pressure and stiffenin and keeping blood vessels healthy ensures blood to the brain. In addition, aerobic exer or levels of a protein known as brain-derh factor, or BDNF, which helps repair and p explains Marilyn Albert, director of the div neuroscience at Johns Hopkins Hospital in

EXPERTS RECOMMEND EXERCISE FOR THE BRAIN

The Global Council on Brain Health (GCBH), an independent collaborative of scientists, physicians, architects and policy experts convened by AARP to provide the best thinking on brain health for older adults, has issued recommendations around exercise and brain health, including:

- Get 150 minutes a week of moderate-intensity aerobic exercise.
- Incorporate strength training two or more times a week.
- Lead a physically active lifestyle.
- To stay motivated, consider exercising with other people.

THE DEMENTIA CONNECTION

So what does all this mean for those con voloping Alzheimer's? A recent UCLA stud women age 65 or older found that those w tive had a 50 percent reduced risk of develo Still, Kaycee Sink, head of the Memory An Wake Forest Baptist Medical Center in Win recommends exercise "as part of a whole l As long as the result is a healthy brain, als recent if it was the exercise or the diet or th
